

## **Conservation Corps of Long Beach Environmental Education Facility**

Signal Hill, California

Client: Conservation Corps of Long Beach  
Architect: Studio One Eleven  
Budget: 1.3 million  
Size: 9,000 SF

This state of the art recycling center allowed the Client to expand their program which assists local at-risk youth. This energy efficient building features sustainable components such as lighting occupancy sensors, skylights, cool roof panels and drought resistant landscaping. The Client was able to satisfy the architectural demands of the City officials by providing a customized entry façade featuring cedar siding, aluminum storefront glass and sunshade canopies.
