

F&M Bank Data Center
Seal Beach, California

Client: F&M Bank
Architect: Shlemmer + Algaze + Associates
Budget: 8.45 million
Size: 56,384 SF

Bremco acted as a construction manager providing project management and site supervision to coordinate the design build disciplines including mechanical, plumbing, electrical and fire sprinkler. Miles of electrical, data and chilled water lines are concealed beneath a raised flooring system, providing heating and cooling for over 200 employees in a sea of modular furniture. A state of the art security system, FM200 fire suppression, a full commercial kitchen, 2-stop elevator and warehouse round out some of the many features of the building.
