

OC Autohaus
Westminster, California

Client: OC Autohaus
Architect: PacRim Architects
Budget: 1.1 million
Size: 3,600 SF

This is an excellent example of a high level of architectural design using economical materials in a creative fashion. The building houses sales offices, customer lounge areas and a three bay garage. The expansive showroom is the centerpiece of the fully developed site with a round, clear story rotunda that is central to various display areas and parking for nearly fifty vehicles.
