

**Rose Hills Memorial Park**  
Whittier, California

Client: Rose Hills Memorial Park  
Architect: Howard Parsell Company  
Budget: \$91,600  
Size: 2,490 SF

Situated in the beautiful Rose Hills Memorial Park complex, this Liberty pre-engineered metal building provides storage for over two hundred custom coffins. The durability and weather tight construction of this building was the deciding factor in the Owner's selection process. The incorporation of an existing masonry site wall into the building's sidewall allows this building to blend in seamlessly with the surrounding structures.
