

United Rentals

Pico Rivera, California

Client: Sierra Group
Architect: Howard Parsell Company
Budget: \$42,000
Size: 1,740 SF

This building is the first application of the prototype shelter that United Rentals plans on installing at all of their equipment rental facilities. The Butler pre-engineered, roof-only structure was selected for its quality and industry reputation. The structure provides ample room for equipment to pass through for easy spray cleaning and yet still provide cover for the steam cleaning equipment and recover pits.
