

Southern California Center for Sports Medicine Long Beach, California

Client: Patterson Street Leasing, LLC
Architect: Fernald Design Group
Budget: 1.74 million
Size: 7200 SF

Contrasting with split-face masonry block and stucco, an aluminum composite panel adds crisp, high-tech accents to the exterior of this building and alludes to the sophisticated medical equipment contained within. As an addition to an existing medical complex, this injury rehabilitation center features three X-Ray rooms, a state of the art MRI machine and an open floor plan for physical therapy.
