

BREMCO CONSTRUCTION INC.

Yellow Transportation Dock Addition

Pico Rivera, California

Client: YRC Enterprise Services, Inc.

Architect: SRG Architects

Budget: 1.6 million

Size: 22,680 SF

Performed by Bremco's in house concrete crew, this 55 door expansion to Yellow's cross dock facility combines concrete tilt-up construction and a Butler pre-engineered metal building complete with skylights, ridgevents and a Butlerib II roof system. Bremco worked closely with the Terminal Manager on site improvements such as yard lighting, on-site fire hydrants, ADA upgrades to the existing office and more than 1 acre of concrete paving which were performed without interruption to the fully operational trucking facility.
